Technical Appendix Figure 1. A circular map of the PV15-279 chromosome is shown. From the outside in: 1st circle, nucleotide sequence positions (in Mb); 2nd and 3rd circles, coding sequences (CDSs) transcribed clockwise and counterclockwise, respectively; 4th circle, CDSs conserved in Sakai ($\geq 90\%$ identity and $\geq 50\%$ coverage); 5th circle, locations of prophages (PPs) and integrative elements (IEs) (red: Stx PPs, orange: other PPs, brown: IEs); 6th circle, GC skew; 7th circle, GC content; 8th circle, rRNA; 9th circle, tRNA.

Technical Appendix Figure 2. Sequence comparisons of all the phages and integrative elements of PV15-279 and Sakai. The dot plot matrices of all the phages (A) and integrative elements (B) of PV15-279 and Sakai are shown. Sequence identities are indicated by different colors. Phages and elements integrated at the same integration sites are highlighted with gray shading.

Technical Appendix Figure 3. Structural comparison of the virulence plasmids of typical O157:H7, SF O157:H–, and GP O157:H7. The structures of the virulence plasmids of the typical O157:H7 strain Sakai (GenBank accession no. AB011548), the GP O157:H7 strains PV15-279 (GenBank accession no. AP018489) and G5101 (GenBank accession no. AETX01000217) and the SF O157:H– strain 3072/96 (GenBank accession no. AF401292) are shown. Homologous regions are indicated by shading, and sequence identities are indicated by different colors.
